

Natural Hoof Care Clinic

Dr. Tomas G. Teskey, D.V.M.

Leading Veterinary Authority on the Equine Hoof and Barefoot Horses

"Whether you've had horses your whole life or are new to the horse world, this one day clinic is for YOU."

The Presentation (Conference Room):

What you will learn:

- Hoof anatomy and physiology
- How to evaluate the characteristics of your horses' feet
- How hoof structures are effected by the domesticated lifestyle
- Prevention and rehabilitation of hoof pathologies
- Trimming theory and practices
- Transition to barefoot
- Barefoot performance horses

"This special presentation by Dr. Tomas Teskey will also review the exciting developments of the horses roaming on the Black Hills of Yavapai County, Arizona". "Learn how these equine habitats are rehabilitating and maintaining physical and mental health".

Afternoon Session:

Dr. Teskey will perform a hoof dissection on a cadaver limb

"The dissection gave me a better perspective and understanding of the anatomy of the horses' feet that you can't get from an X-ray or text book pictures

"It wasn't as gory as I thought it would be"

(Dissection will be held inside)

When: Saturday August 15, 2009

Where: American Legion Post 34, 6272 E. Cave Creek Rd
