## *Embrace your Inner Zorse!*

**James Welz**

**Yvonne Welz**

**Zandy the Zorse** doesn't have anything bad to say about horses—or mules. And she knows that many people will always prefer horses (or mules, donkeys, zebras). But she thinks she's the best! And of course, she should!

Like Zandy, our method at **Hoof Help Online** is a cross-breeding. We're not clearly one thing... nor another. We have common elements with other barefoot methods, but we are definitely a unique individual. We don't quite fit in with other groups. We are the beginning of a whole NEW BREED.

Many people think we teach the same barefoot methods taught elsewhere. We do not. What we teach is **unique**. And we have no problem with other methods and techniques—*all the best to those who try to help horses*. But education, time, observation, experiences, and many thousands of hooves have led us here, on this new and unique path—to a very different, and oddly controversial, place.

Because once people figure out that we really are **different**, then we become targets for attack, simply because we have stripes and don't look like the other horses... Well, you get the picture. We break **all the rules**. We turn upside down, not just conventional wisdom about hooves, but we flip the modern teachings of barefoot by doing things that are "not supposed to be possible." We have some science to back up what we do, but it is the horses, the hooves, and the owners who have made it clear: we are on a correct path.

*"I like your method, it makes total sense once you start to learn the whole thing and see the results. You guys are really the only ones that have your method and the why to your method. You have an answer as to why you do what you do and you don't have to be a rocket scientist to learn it!"—Hoof Help Online member*

**Buck the trend! Be an individual and be unique!**

Hoof Help Online is a **self-study website** where you will learn our system of trimming. We will teach you how to create our trim on your own horse's hooves. Over time, your horse will develop the healthiest hooves possible—no matter where you live. Our trim is safe, effective, non-invasive, and easy to learn. We teach you to read the hoof and adjust as necessary, learning from your own horse. Our unique trim is the sum of all its parts, and based on creating a healthier internal foot by adjusting the pressures of the hoof wall. You will have more control over your horse's feet than you ever dreamed possible!
