

Hoofcare Specialist Angle Guide Template

8 in. wide x 8 in. high

Directions: Purchase an 8" x 8" piece of 1/4 inch thick Plexiglass (available from glass/crafts/plastic stores.) Place this plexiglass square on top of this template, and using a waterproof fine-tip felt pen, or glass etcher, trace these angles. It's a good idea to bevel or sand the outer edges of the plexiglass until smooth to prevent cutting yourself.
